

# What Are We Doing Well

When thinking about technology in the Enid Public Schools, what are we doing well that you would like to see continue?

1. successmaker computer programs
2. Teacher training
3. united mainstreaming, computers in every classroom
4. Tech support, United Streaming
5. training and helping with problems
6. response to problems is good.
7. Computers in all classrooms are great.
8. Work orders have been taken care of promptly.
9. We have the computer system in every room. I am able to answer specific questions my students have over many different topics in very quick manner.
10. I love United Streaming. Also, quick response on problems, assistance, etc.
11. Training, Recording Staff Development, Gradebook programs, Science and Math Lab programs and Experiments.
12. Getting teacher input.
13. The United Streaming program is helpful. Also, the prompt and helpful technology staff who assist with our technology questions and problems, do a great job. I would like to see these continue.
14. Repair is great.
15. Adding technology (the computers from the last bond issue are a big help.)
16. one word--- JOE
17. Using tech orders instead of using green sheets.
18. I would like to see an upgrading of networking of our computer systems. I think we have a good start.
19. You have provided us with an updated computer in each room, and most of the time it is working well, or else someone will service it. You look ahead to see what's coming and try to provide it. Our students are allowed to use computers and printers in the library very frequently.
20. The tech staff has been very helpful whenever we need them.
21. workshops and information to all
22. na
23. On-line reporting of problems. Weekly technology assistance from qualified technicians.
24. Reports and record keeping
25. You have been quick to respond to problems when I've requested assistance on line.
26. Everyone is working hard to upgrade . The inservice training is beneficial.
27. The people within the technology department are always polite and willing to help. They have a lot of schools to deal with and they seem to maintain a good sense of humor.
28. Good at keeping software and internet filtering systems updated.
29. Having a tech person to help with problems, quickly.
30. I LIKE THE USE OF SMART BOARDS IN OUR CLASSROOM, AND WOULD LIKE TO SEE ONE IN EACH ROOM.
31. Techs in school on regular basis Troy is doing a great job here.
32. I appreciate the immediate help that the technology center has been giving us. When we need help they are there to give us help. I would like to see this continue!!!!
33. Repairs of computer problems have been prompt.
34. I feel we have very good tech support.
35. I really think the Streaming is a great idea. We don't use it very much in my math classroom, but for other subjects, it is an awesome idea.
36. updating hardware/software weekly visits by a technician training creating a plan/vision for the district
37. The support with the tech. support Tyler. inservice updates continually
38. continue to increase technology in the classroom, continue to offer trainings for teachers/staff
39. Training integration is well done ... would like access those resources we are trained on...\$\$\$\$ ;-(

# What Are We Doing Well

When thinking about technology in the Enid Public Schools, what are we doing well that you would like to see continue?

40. I like having someone assigned to my school site that is helpful and there to answer questions.
41. I am very thankful for the use of Tyler, but I wish he could help me when I don't have students so I can concentrate on my questions I have lined out for him and understand what he did so when I mess up that I could fix whatever the next time myself. I enjoyed learning how to use the computer to put pictures on with music, but I needed a prepared outline on paper that had the sights on it, because one wrong letter messes up the whole connection.
42. Asking for teacher input.
43. keep hardware and software upgraded
44. I am glad that more and more classrooms are and will be getting SMART boards. I love using the one in my classroom. I am also glad that I have and appreciate having computers in my classroom that my students and I can use.
45. Offering online workshops as in required staff development
46. I like the integration of Smartboards into the classrooms.
47. specialized classes
48. Continually upgrading our network to provide faster connections. Also, continuing to upgrade our computers so that they will run at a faster speed.
49. N/A
50. Grow
51. Getting smart boards in the classrooms
52. Smartboards were purchased for some classrooms.
53. emailing messages to the district
54. constantly upgrading
55. The latest update in the computer lab was positive but more needs to be done.
56. SMART BOARDS
57. keeping up with the latest technology
58. You have very good and knowledgeable support people.
59. Inservice
60. Tech support available weekly. Periodic updated technology. Subject related software.
61. Email use is growing. Opportunities for training have increased.
62. Work orders seem to be taken care of in a timely order. I wish Maintenance kept up as well.
63. daily computer use
64. Tech support is great here at Enid High.
65. I see the tech department trying new ideas and working to get new technology for our classrooms.
66. I liked the "evening of discovery" held early this year. I would like to have seen the items for a longer period of time
67. Keeping abreast of current trends in technology and trying to get teachers to utilize it in the classrooms.
68. It is ever increasing, ever so slowly!
69. Continue the training, we all need to know how everything works.
70. over the years you have gotten computers into all the classrooms, would like us now to use them for attendance, receiving principal bulletins, etc. Often when I have tried scheduling labs for class usage, they are full... so the need for additional lab settings seems evident. The set up to have computer problems addressed has worked VERY well and very professionally! Liked having blood borne pathogens inservice online.
71. YOUR RESPONSE TO OUR COMPUTER PROBLEMS/WORKSHOPS THAT HAVE BEEN AVAILABLE
72. I attended a small class on power point I and I was impressed at the information I gained.
73. Smart boards in the classes as funding allows and providing training for teachers.
74. Giving students access to information networks

# What Are We Doing Well

When thinking about technology in the Enid Public Schools, what are we doing well that you would like to see continue?

75. It is a great benefit that all classrooms are internet assessable.
76. trying hard it appears to move us into the future with technology. I appreciate that someone is continually looking to fix/ update the computer lab. I wish we could have more choices for the lab that fit into other subject matter. The science is great--what about social studies? That would be really nice as well.
77. The response time to fix what technology we have is good. Keep it up.
78. Computer techs have been a great help as well as the classes that have been made available to the staff. The technology evening that was held at Enid High was great.
79. I like the online daily bulletin
80. tech in the building weekly classes relative to our needs
81. continual upgrading work orders answered in timely manner
82. Problems seem to be dealt with quickly
83. ...encouraging all of us to keep expanding our knowledge of and experience with technology
84. The latest up-to-date training on available technology has been very good.
85. Making internet use accessible for students and having networked labs with usable software.
86. support
87. Continued training in the programs we are currently using to find better ways to utilize them.(Successmaker) Website
88. The new Success Maker program is good. The reports available through it are very good. It is relatively easy to access.
89. Computer lab is helpful in student test scores. Teacher training. Each teacher with own computer.
90. Training for teachers, providing new technology, and providing current technology tools for all schools.
91. Parent communicatoin
92. I think Smart Boards are wonderful tool for teachers. Wish more schools were able to purchase these.
93. Tech repairs have gone well. I like the on-line workorder request.
94. Continue to update and stay on top of new technology
95. Staff Tech's are very helpful if we have a problem or question.
96. I like that a tech is assigned a site.
97. frustration with the technology is great very little positive feedback is available from me and others at this point
98. Coming quickly to fix whatever problem I have.
99. Computer Lab
100. I have enjoyed participating in the technology class where I received training on the link up with resourses that enable us to gather graphics,music and text for curriculum presentation.
101. United Streaming
102. I like the communication through e-mail because it saves paper and is easy to access. I like keeping my staff development points on line also.
103. 1. Computer technicians are very helpful and never make you feel inadequate or stupid about the questions we ask.
104. Formal class at a remote class
105. The classes at the ITTC are very nice. It would be nice to have a good selection every month or so.
106. The Enid Public School website is very useful professionally. This needs to continue.
107. The training and use of things like movie maker and united streaming. the prompt repair service! and the effort made to respond to inquiries about things we see or learn about.
108. Tech support

# What Are We Doing Well

When thinking about technology in the Enid Public Schools, what are we doing well that you would like to see continue?

109. You seem to be current with the "new" gadgets that are out there...we just can't afford to have them in the classrooms. If I don't have the item to use, it doesn't pay for me to spend anytime learning how to use it..I want the classes to continue...I also want the gadgets that go with the instruction
110. We have had better training and more opportunities for training. Training is better when done during the school day rather than after school when we are tired and have other responsibilities to get to (families, etc)
111. Providing computers for student use.
112. Taking care of problems we have with technology and teaching us about new technology available
113. In-service in the different technology area and continue training in new software N
114. The new HP computers for each class room was great, would like to see continued investment in USEABLE technology.
115. Updating programs and hardware
116. I appreciate Troy's regular visits to trouble shoot problems and offer assistance with tech. Carver needs new technology to facilitate instruction.
117. SuccessMaker Making us aware of what is out there that we can dream of getting some day
118. A bit more "handholding"
119. The response time on work orders has always been prompt!
120. Continuing education roster is kept online- is convenient and easy to use.
121. Online problem reporting is working much better. Response time for individual issues is good.
122. I appreciate the computer tech's coming out if needed.
123. Keeping technology current. Also tech work is being completed in a timely manner. Great job with this.
124. Someone assigned to each building
125. The SuccessMaker Lab is a great asset, but I would like to see it available for all students to use rather than just for Title 1 or Special Ed.
126. I like having a tech employee assigned to our school each week.
127. The training that has been done is good. But we need the equipment to do those things.
128. Workshops that you have are wonderful and very valuable!!! Keeping us on top of what is out there and how to use it.
129. At the elementary level, I think we're doing a good job of keeping the Lab hardware and software updated. I would like to see more updated computers and software in the classrooms where we currently have only 1 computer that is less than 5 years old. Most classroom computers are too old to run a lot of the software we'd like to use and/or purchase.
130. sending building reps to meetings and then bringing the information back.
131. I would like the Successmaker program to continue. This has helped with my student's math and spelling skills.
132. The workshops are valuable to me. Also, the onsite tech workers in the buildings are GREAT ! I really appreciate Joe Melrose and Tana being here at Glenwood. They are so helpful.
133. Use of computers in all classrooms.
134. Updating equipment Efficient, knowledgeable, courteous service Keeping informed about current equipment, materials, and options Investigating and learning from successes and mistakes in other districts
135. I generally like the SEAS program when everything is working the way it's suppose to.I'm pleased that I have a choice to use a stand alone printer or a building printer. I'm happy a have small group training for programming.
136. The tech support has greatly improved in the last two years. The response time is fantastic and dependable. Also, I appreciate the courses and training that are offered in the new technology EPS has available.

# What Are We Doing Well

When thinking about technology in the Enid Public Schools, what are we doing well that you would like to see continue?

137. Providing assistance when needed. Being innovative and futuristic with technology. Fall technology seminar at EHS.
138. providing United Streaming, district communications by e-mail, and especially having a computer tech scheduled for a time each week
139. I like haveing Mike as my tech person. That relationship with my teachers and that he knows the needs in my building because he knows what has taken place here is very positive. He also knows the people here and how much they know about computers so then he knows how to work with them. He is very positive and helpful. i feel our district has moved forward in the last 2 years and I really want to move towards the Smart Boards and clickers in the classrooms.
140. Tyler is very prompt and helpful. All of the programs on the computer are also very helpful for district wide use!
141. generally, I feel that most all our needs are being met, giving the budget.
142. Whenever I have computer problems, the computer techs respond quickly. They have always been supportive.
143. The technology department has made tremendous improvements both in services and knowledge on ways to integrate technology into the classroom. I truly believe that it will not be long before the rest of Oklahoma comes to Enid to learn about technology.
144. Emailing out opportunities - so that we are kept aware of what is offered in tech training.
145. Tech Work Orders--like the quick response to problems that I may be experiencing in our LMC.
146. Continuing to add more technology
147. We are providing adequate training.
148. Computer lab successmaker
149. computer repair
150. Upgrading resources and technology
151. our PTA buying smart boards, best thing we have
152. communication with faculty/staff
153. Having a tech in our building at least once a week has been helpful. Classes at Central Office have been informative. Unitedstreaming is a great resource, however having Worldbook Online taken away was a negative.
154. The tech support is outstanding in our building. Having Mike S.in the building weekly has been most helpful as he always has a good attitude and is very helpful and efficient when trying to solve our technology problems. Continue to add new updated computers in the areas that have the heaviest use such as the libraries and computer labs.
155. You are providing opportunities for us to learn about what is out there, but then we want the new technology!
156. Quick response to problems.
157. trouble-shooting
158. tech help is good, our network is great, access to internet, united streaming also
159. The support from the tech department is great. I have also benefitted from training sessions on various programs such as photostory and movie maker. These programs have allowed me to tap into the vast resources available. It seems the more I learn, there more I find that there is more out there that I don't know.
160. Updating software as needed and continuing to meet new needs as they arise.
161. The use of our one projector and laptop. Internet educational web sites: Study Island, SuccessMaker ect.
162. I have had many problems with my computer this year and Troy has been very helpful in making sure that my computer is up and running.
163. very prompt on fixing any technology that needs repaired.

# What Are We Doing Well

When thinking about technology in the Enid Public Schools, what are we doing well that you would like to see continue?

164. I see a continued growth and interest from the tech. dept. to aid teachers in their acquisition of tech. knowledge. There have been numerable opportunities for training.

165. I appreciate getting a computer in every classroom. I also appreciate that we have internet access.

166. Support has been great at my site. Mike has been helpful and supportive of any problems or new ideas.
